

eTwinning POSTER COMPETITION

Future-ready school

A simple guide to help your pupils take part — step by step.

1 Get started

You can work on your own or in a group with others from your class or school. Ask your teacher for the rules.

2 Choose your theme

Pick the one idea that matters most: **working together, skills for the future, inclusion & wellbeing, student voice, or being ready for change.**

3 Some questions to get you started

- What will school look like in 10, 20 or 30 years?
- Will AI be a classmate, a tool or something else?
- Will classrooms still have four walls?

4 Choose your message

Agree on the single message you want the poster to send about your school's future — keep it clear and simple.

5 Experiment and create

Sketch, paint, make a collage or design digitally. You can use an official language of your country if you wish. Adults can help with the technical side — but the **ideas and final artwork** must be your own.

6 Submit the poster

Save it as a JPG or PNG (no videos). Ask your teacher to submit the poster image by **1 March 2027.**
